

Huobi API Change Notification

Notification: Huobi Global is going to introduce a new REST API endpoint for market status querying

Content:

Dear API user,

Since the effective date of this notification, Huobi Global will introduce a new REST API endpoint –

GET /v2/market-status

Effective Date: 27 Jun, 2020 (GMT+8)

All the changes will be updated on <https://huobiapi.github.io/docs/spot/v1/en/>

Huobi Global

28 Jun, 2020 (GMT+8)

Change Details

Since the effective date of this notification, Huobi Global will introduce a new REST API endpoint –

GET /v2/market-status

Request Parameter

None

Response

Field	Data Type	Mandatory	Description
code	integer	TRUE	Status code
message	string	FALSE	Error message (if any)
data	object	TRUE	
{ marketStatus	integer	TRUE	Market status (1=normal, 2=halted, 3=cancel-only)
haltStartTime	long	FALSE	Halt start time (unix time in millisecond) , only valid for marketStatus=halted or cancel-only
haltEndTime	long	FALSE	Halt end time (unix time in millisecond) , only valid for marketStatus=halted or cancel-only

haltReason	integer	FALSE	Halt reason (2=emergency-maintenance, 3=scheduled-maintenance) , only valid for marketStatus=halted or cancel-only
affectedSymbols }	string	FALSE	Affected symbols, separated by comma. If affect all symbols just respond with value 'all'. Only valid for marketStatus=halted or cancel-only

Notes:

- 1) While marketStatus is updated with value 'halted' or 'cancel-only', haltStartTime & haltReason will be updated too at the same time. But haltEndTime might be updated later.
- 2) normal – both order submission and order cancellation are allowed. halted – neither order submission nor order cancellation is allowed. cancel-only – only order cancellation is allowed.

What are the Impacts on You, and What You Need to Do?

API users should evaluate the business impact caused by the new endpoint, further to make relevant change in client's application, if needed. All the changes will be updated on [Huobi API Docs](#) on the effective date.
